DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1-4 rejected under 35 U.S.C. 103(a) as being unpatentable over Nakanishi (JP5447016) in view of Yasuhiro (JP63194540).
Nakanishi substantially disclose the claim invention. However, Nakanishi do not disclose the coil wire connected to the second commutator having a smaller diameter than that of the coil wire connected to the first commutator and a means for cooling.

Yasuhiro disclose in fig. 1-6 a commutator motor comprising: a first (12) and second (13) commutator having coil wires connect to each commutator wherein the coil wire (13) of the second commutator has a diameter smaller than that of the coil wire (10) of the first commutator and a means for cooling (3) the second wire for the purpose of preventing the coils from overheating. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the AC/DC commutator of Nakanishi with the coil structure of Yasuhiro for the purpose of eliminating a loss due to contact of brushes with the commutator and reducing the size of the commutator.
